# What does it take to produce food?

The pictures represent the resources needed to produce food.

Group the resources into two categories.

Natural

---

---

---

---

---

Human

---

---

---

When all of the resources are used together to produce food the activity is called \_\_\_\_\_.

If one of the resources were removed from the outside of the circle would we still be able to produce enough food to feed all of us? Yes or No? \_\_\_\_\_

Explain your answer.
