

Mystery Garden Worksheet #3

Hello Plant Detectives! We have received word that BC Agriculture in the Classroom has a mystery to be solved – a mystery garden, to be exact!

We will need your special detective skills of observation, problem solving, and creative thinking to solve the mystery of what plants are growing in this garden, and how they grow. The clues will appear along with pictures of the garden on the BCAITC Facebook and Instagram pages regularly.

Good luck detectives!

Week 3: Growing Curiosity

After 10 days, with regular watering and lots of sunshine, more plants have germinated.

1. Do all of these plants grow at the same rate? _____
2. Do the leaves of the plants look the same, or different in each tray?

3. PREDICT which seed cups will germinate next. DRAW what you think the plant will look like in the square below. WRITE the type of plant you think will grow on the line beside your picture.

	<p>I predict the next plant to grow will be</p> <p>_____</p>
