

Mystery Garden Worksheet #5

Hello Plant Detectives! We have received word that BC Agriculture in the Classroom has a mystery to be solved – a mystery garden, to be exact!

We will need your special detective skills of observation, problem solving, and creative thinking to solve the mystery of what plants are growing in this garden, and how they grow. The clues will appear along with pictures of the garden on the BCAITC Facebook and Instagram pages regularly.

Good luck detectives!

Week 5: Looking Leafy

23 days after planting and look at all those leaves! Leaves help provide energy to the plant so that it can continue to grow. The plants are getting bigger and more colourful thanks to their underground roots that provide the plant with water and nutrients. Several new sprouts have grown as well!

1. Which seedling has the widest leaf? _____

2. Which seedling has the narrowest leaf? _____

3. What colours do you see on the stems of the seedlings?

4. What part of the plant isn't visible above the ground? _____

5. What job do the roots perform for the plant?
